About Us: Company Overview

Imagine,

A world of possibilities for everyone big and small;

A world that is made stronger when people work together;

*A world where technology makes us run faster, stronger,
secure;*

A world that works with one goal

*We make the lives of those that
depend on us better.*

World of Change and Technology

We are living in a world that is fast changing with the power of technology. There are more than 1.75 billion smartphone users in the world, 7.2 billion Internet users, and adoption of technology for various functions in daily life has grown rapidly.

More data has been generated in past 5 years than in history of mankind. Understanding this data, to provide cutting edge business solutions is an imperative. People not only expect the service providers to be technologically updated but rather view late adopters with suspicion.

A business can now exponentially expand its reach, service more customers with same resources, and hence needs experts to guide them through the various options.

Who we are

Splenta Systems Private Limited is established IT Company delivering software services to clients worldwide. Splenta has a strong team of experienced IT experts.

Our Offerings **Services Portfolio**

ERP/CRM IMPLEMENTATION

The key to maintaining margins in any enterprise is to having an efficient enterprise solution. We have vast experience implementing cost effective ERP and CRM solutions for various Industries like Retail, Manufacturing and Banking. We have been part of some of very large scale ERP implementation and Spend Management Solutions. If you have a business case for streamlining your transactional systems we are the right people to help you do that.

BUSINESS INTELLIGENCE

We provide tools which transform your data into insights so you can make informed decisions. We provide services to mine organize and present your data. Performance is key to any dashboard. Every business user hates to see a spinner saying the data is loading. You need fast, accurate and intuitive dashboards to showcase your data; we provide you the best in class enterprise Business Intelligence Solution. Connect with us to simplify your business decisions.

E-COMMERCE SOLUTIONS

Retailers large and small struggle with stagnant to decreasing top-line. Investments into brick and mortar add to the product costs, customers have to pay the additional cost of stock holding. Today the acceptance of online commerce and growing interest towards mobile commerce provides opportunities for every retailer to benefit from multi -channel commerce. We can help evaluate your existing setup and maximize revenue growth.

COLLABORATIVE SOLUTIONS

For every organization to function efficiently there has to be collaboration from bottom up. As part of our enterprise setup we have identified the key areas where communication and lack of sufficient know how impact end results. Collaborative solutions should be simple and non-intrusive. We have an efficient team of HCM consultants and project management consultants who can help implement an effective collaboration solution for your enterprise.

MOBILE APPS

Being mobile-ready means you'll reach customers in more places than ever. The two most popular operating system that drive mobile devices, are iOS and Android. Though HTML5 is the future of Mobile applications. Native applications can deliver a much more interactive experience. They can leverage the power of computation from the latest quad - octa core processors. We know that the future of technology industry is toward Mobile operations. We are on a constant drive to imbibe latest in technology. Our engineers are already discovering and experimenting with wearable technology.

Our Domain Expertise

Banking

We have built and executed the first Banking ERP solution in India; we have been the key to success of rollout of our Spend Management solution based on Openbravo ERP in one of the largest banks in India with over 1200 branches. We have successfully implemented the solution to scale across all branches with high concurrency.

We are on the path of implementing other banking solutions for Acquisitions, facility management, Accounting summary analysis, Big Data analytics and Media solutions for Digital Banking.

Our solutions provide cost effective and highly user friendly solutions for our banking customers. If you are looking to reduce costs and provide greater value for your internal as well as end customers. We have the right solutions built on Open Source technologies.

Retail

We have the expertise of implementing retail multi-channel merchandizing solutions which can scale to millions of transactions.

Our Solution has enabled one of the largest sports retailers in Europe to setup ecommerce and store merchandizing solutions. We have provided affordable yet scalable solutions which improved the customer satisfaction rate over billing counters.

Our logistics solutions are aided by RFID and Barcode Readers, which has enabled faster and more efficient delivery of goods to stores and customers.

Mobile commerce with Square Card readers is the next generation of retail experience we are building solution with our flag ship customers to enable them with smarter yet cost effective solutions in retail. If you are ready to adopt the future of multi commerce business, partner with us to reach higher profitability.
